INTRODUCTION

Drone Token is an advanced, AI-governed, decentralized cryptocurrency built on a multi-layer Proof-of-Stake architecture with quantum-resilient infrastructure and intelligent governance. Designed to bridge the gap between traditional finance, Web3, and cross-chain ecosystems, Drone Token empowers users to stake, govern, and transact securely across multiple blockchains.

The Drone Token protocol introduces a paradigm shift in decentralized finance. Inspired by Nikola Tesla's concept of 3-6-9 as the key to the universe, R369 aligns this philosophy with code, logic, and economic design. It is built for long-term sustainability, deflationary tokenomics, and full decentralization through a DAO.

MISSION & VISION

To create a secure, energy-efficient, and self-governed digital asset economy powered by logic, automation, and community consensus.

To offer a multi-chain, AI-assisted governance layer that empowers stakers, developers, and institutions to co-build a decentralized financial system.

FEATURES

- ✓ Proof-of-Stake for green and energy-efficient consensus
- ✓ Fully DAO-Controlled Governance
- ✓ Slashing Mechanism to punish bad validators
- ✓ Cross-Chain Compatibility (ETH, BSC, Solana, Polkadot)
- ✓ EVM Smart Contract Support
- ✓ Fast Transaction Finality (5 seconds)
- ✓ Ultra Low Gas Fees (< \$0.001)
- ✓ DeFi Ready Modules (DEX, Lending, Farming)
